

Provide a coin operated internet terminal at your venue, simply and inexpensively.

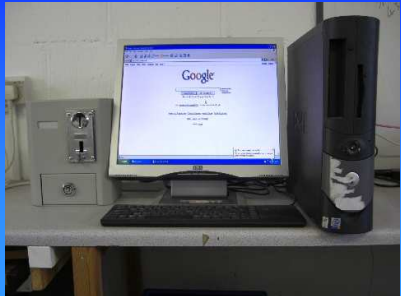

+
Speeder internet coin box.

+
Any new or second-hand computer.

Coin operated Internet terminal.

=

It is a simple, practical solution to providing internet access to your clients. The Speeder internet coin box works with special software to prevent anti-social use.

We use the same secure drawer and lock for our domestic units as we supply to our professional launderette clients.

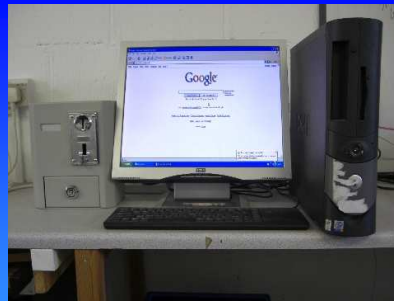

Fit our internet coin timers they are completely stress and maintenance free.

Speeder coin boxes can be fitted to any make or model of computer!

£1, 50p, 20p coins, Euro coins or even tokens!

You, the owner can set the price for internet use to a economical AND profitable level!
We suggest £1 / Euro = 15mins.

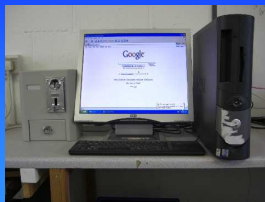

Easy to install! Same as loading a new printer.!

Just plug the coin box into the computer and load the software.

Job done!

Starts paying for itself on day one.

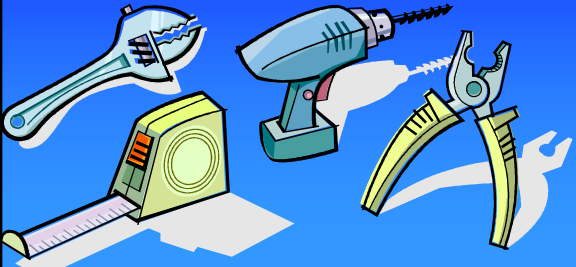

Rugged and secure!

The same welded steel case is used in coin laundrettes!

No maintenance or adjustment required!

The illustration shows four tools: a silver adjustable wrench, a blue and green power drill with a drill bit, a yellow spirit level, and a pair of yellow pliers. They are arranged on a blue background with soft shadows.
